

# dtTools

## Capture - View - Convert - Save-as - Print - Link

SDI Desktop Tools provides the most powerful and comprehensive, integrated suite of commonly needed graphics utilities in one, economical, easy to use package. Finally, a single application for rapid Screen Capture, Multi-format file viewing, Format Conversion, Save-as and, no hassle Printing is now available on the UNIX, Linux and Windows platforms. Workflow is further enhanced with direct launch and integration of other licensed SDI programs and, on the Windows platform, viewed images can be copied to the Clipboard for immediate insertion into other Windows applications.

BMP, CGM, JPEG, PDF, PNG, PNM, PS, TIFF, and XPM

dtTools runs on UNIX, Linux, and Windows

### Capture

dtTools provides the speed and convenience users need when capturing an entire desktop, an active window, or rubber band, rectangular area of the screen. dtTools immediately displays the captured image for confirmation before saving or, transferring to another application.

### View

Click on *File/Open* (Ctl+O) or use the dtTools toolbar to view BMP, CGM, JPEG, PDF, PNG, PNM, PS, TIFF and XPM files. dtTools shows the exact composition of the image revealing how it will look in a montage, annotated file, slide presentation, or company Web site.

### Convert and Save-As

Captured images and viewed files can be exported in any of the following popular formats: BMP, CGM, JPEG, PDF, PNG, PNM, PS, TIFF and XPM.

### Print

dtTools provides no-hassle printing with SDI's integrated print processor. After displaying a file, or captured image, clicking *File/Print* generates a 'best fit to page' image for any attached UNIX, Linux or Windows printer. Alternatively, one click of the Submit icon opens SDI Print Master to provide flexible printing options with scaled output, orientation, multiple copies, job tracking, cropping and much more.

### Launch and Link

The user customizable Launch icons on the dtTools toolbar provide seamless integration and transfer of images to other SDI programs including; Montage, Editor, Author, Convert, Office, Scope and Print Master. In addition, on the Windows platform, images captured or displayed with dtTools can be copied to the clipboard for immediate use by any 3<sup>rd</sup> party OLE compliant application including; PowerPoint, PhotoShop, Quark, Word and countless more.
